

Marc Oberon - Close Up and Cabaret Magician

"Marc Oberon has become European Champion of close-up magic - beating off eight of the world's best magicians."

Close quarter Magic is the hardest of all the illusionist's disciplines. When you are standing two feet away from the audience, there is no opportunity to rely on smoke and mirrors to hide your actions. It requires great skill and hundreds of hours of practice to perfect.

Large audiences are often predictable in their reactions but a single person can react unexpectedly, so a close up magician acquires that extra skill of adaptability only learned through experience.

Whether Marc is performing for a nightclub audience, a corporate function or delivering a tailored message for a product launch or trade show, the audience large or small will soon believe in Magic!
