

Silhouette Cutters

'Just scissors and paper!'

An extremely unusual way for your guests to remember your function. A silhouette cutter, with their unique demonstration of hand-eye co-ordination, will help to make your event an unforgettable one! By turns flattering or humorous, their paper "cameos" are cut straight out in a matter of seconds, with nothing more than scissors! There's no need to draw them out first! The resulting likenesses are mounted on presenter cards and handed out as souvenirs of your event.

Low technology at its very best!
