

## **Technical and Production Services**

### **Complete Production Solutions**

Our aim is to provide a one stop solution to the production needs of your show.

We can provide & coordinate a range of facilities including staging, sound, lighting, backstage facilities and management in a fully integrated package to suit your event and budget.

Our 'event in a box' solutions have been proven to make planning & organization of shows more manageable and production more cost effective.

Packages are tailored to the specific needs of the event. An 'in store' promotion, roadshow, fashion show, special event, festival of concert, indoors or outdoors we can compile a selection of integrated facilities to make the show happen.

Our production team will not only compile a package of facilities but ensure compatibility of all technical elements requirements & logistics allowing the event 'organizer' to focus on 'organizing' the many other important elements of any events.

**From staging to communications a production package can include a wide selection of elements, services and facilities.**

A tailored production solution package can include all kinds of elements. We can offer a wide & varied selection of facilities & services.
